16

IGF

MINI - SYMPOSIUM IGF

IGF Sud - Seminar room

CELL SIGNALING: FROM NANOSTRUCTURES TO PHYSIOLOGY

9:00
am

Exploiting the potential of arrays of nanostructures for biological applications

Karen MARTINEZ

Nano-Science Center, Copenhagen, Denmark

9:40
am

Beyond the standard GPCR: receptor variants and orphan 7TM proteins

Ralf JOCKERS

Institut Cochin, Paris

10:20
am

BREAK

10:30
am

Calcium-dependent hyperexcitability of spinal neurons

Marc LANDRY

Interdisciplinary Institute for Neuroscience, Bordeaux

11:10
am

Chemokines neutralization by small molecules: discovery, characterization and physiological and physiopathological implications

Jean-Luc GALZI

Institut de Recherche de l'Ecole de Biotechnologie de Strasbourg, Illkirch
